4 SOLICITATION AND TECHNICAL REQUIREMENTS

Guam Power Authority Professional Printing, Mailing and Processing Services

General:

Established in 1968, Guam Power Authority (GPA) is a public corporation and an enterprise fund of the Government of Guam. GPA's governing board is the Consolidated Commission on Utilities (CCU) consisting of five elected commissioners.

GPA provides electric services to the island of Guam with 48,000 customer connections.

Our Billing section is responsible for preparing approximately 48,000 bills per month for print and mailing. The meter reading and billing processes are divided into 30 cycles with approximately 1,800 bills per cycle. A bill print file is processed and printed based on a set schedule of the cycle. Please note that multiple cycle can be processed in a day.

In addition, the Consolidated Commission on Utilities oversees Guam Water Authority (GWA). GWA provide water and waste treatment to the island of Guam.

GWA has 48,000 customers. If the business relationship is successful, GPA has the right to extend the RFP to Guam Water Works.

Current Customer Information System:

GPA recently converted our billing system to Oracle's Customer Care and Billing (CC&B) V2.4.0.1.0. Oracle Customer Self Service with Oracle replaced our current web based customer self-service system. This allows customers to easily view the bills and make payments online.

Purpose:

Guam Power Authority is seeking proposals from qualified vendors who can provide dynamic bill design, processing, print, finishing, mail, insertion, and electronic archiving of customer bills from Oracle's Customer Care & Billing (CC&B) solution. Guidelines with industry standards and best practice need to be considered when working with GPA and the bill reformat.

Scope of Work:

The following is an overview of the major requirements/specifications in which Guam Power Authority (GPA) is interested and provides explanatory information regarding items within the SOW.

A. Communication - This area covers the methods of data transfer from GPA to the vendor. You should indicate all methods of data transfer supported and the recommended method for transferring data. If the data must be delivered in a manual or non-electronic manner, please describe the method, delivery, turnaround time frame, additional costs, etc.

B. Security - This item addresses the security methods employed by the vendor to assure that transfer of

GPA customer data and data processing is secure. This should also cover the finished products and its electronic and physical distribution. All encryption software, procedures, secured lines, etc. should be listed.

C. Bill Format Software - Guam Power Authority is looking to provide a flexible-billing format to support multiple metered and non-metered services. It is the intent of GPA to have the vendor format the billing statement from the provided layout, utilizing proven software.

D. Electronic Archive - Guam Power Authority is interested in obtaining an electronic archive of the bill and other documents sent to its customers to facilitate better Customer Service. This archive will need to be available directly after the bill extract is processed and represent a true image of the bill or other document to its Customer Service Representatives.

CC&B/Website Integration

Guam Power Authority would like to have the ability to have the electronic bill link to its CC&B application and GPA's Online Payment solution.

E. Internet Email Delivery or Notification of Bill - Guam Power Authority is interested in the ability to notify the customer that a bill is available via email. The internet accessible bill must be generated in a format that represents the true image of the bill, as well as not require special software licensing on the client. This true image must represent charts and graphs, logos and graphics, fonts, etc.

F. Duplicate Bill - This area addresses the ease and method of duplicate bill delivery at GPA's or the customer's request.

Return/Undeliverable Bill

Describe how return or undeliverable bills are addressed and notification to GPA of such.

G. Special Handling/Pull Bill - This section deals with the ease with which the vendor can handle special requests, particularly whether the vendor can pull a bill electronically or whether the vendor needs to rely on manual methods.

H. Printer - This area deals with the flexibility and features of your printers. As GPA starts to offer more services, it may be necessary to utilize different paper sizes and paper stocks.

I. Finishers/Insertion Equipment - This section addresses the features available on your finishing/insertion equipment.

J. Mail - GPA wants the best value as well as present a host of delivery options to its customers. Please also include if local printing and mailing will be available.

L. Processing Window - GPA needs to understand the deadlines and turnaround times between delivery of the bill print file, printing, and mailing to our customers.

GPA would like to know the timeframe of mailing of bills to customers from delivery to actual receipt.

M. Disaster Recovery Plan - Answering questions within this section will allow GPA to discover your

processes and procedures in regards to Disaster Recovery and backup processes.

N. Reporting - Describe your balancing and quality assurance processes. How do you determine that every bill transmitted for processing is worked and data printed is accurate?
