GPA AWARDED 150K GRANT

The Guam Power Authority was informed through correspondence that 150K was awarded through the Homeland Security Grant Program (HSGP) for an investment project to fund security gates at one of the Authority's facilities. The approved grant project met one of six Investment Justification projects that were submitted through the HSGP Strategy Initial Implementation.

"The Authority has been taking more aggressive steps towards developing its grants applications and grants management capabilities" stated Joaquin C. Flores, P.E. GPA General Manager, "GPA is trying to take full advantage of alternative funding sources for its capital improvement program. GPA wishes to thank Frank Ishizaki and the Guam Homeland Security Office of Civil Defense for their assistance in the grant application process."

GPA will now work on specifications for the project in accordance with all HSGP terms and conditions along with all other federal regulations and requirements by HMS, the federal grantor agency. The project is scheduled to be completed by August 31st, 2011.
